CONTENTS OF VOLUME 38

NUMBER 1—JANUARY 2007

Neighbourhood detection and identification of spatio-temporal dynamical systems using a coarse-to-fine approach
L. Z. Guo, S. S. Mei and S. A. Billings 1

New stability and stabilization conditions for systems with time-delay
Y. Xia, G. P. Liu, P. Shi, D. Rees and E. J. C. Thomas 17

Dynamic output feedback H_∞ control of discrete-time fuzzy systems: a fuzzy-basis-dependent Lyapunov function approach
J. Lam and S. Zhou 25

Simultaneous identification of time-varying parameters and estimation of system states using iterative learning observers
W. Chen and F. N. Chowdhury 39

A set of novel correlation tests for nonlinear system variables
L. F. Zhang, Q. M. Zhu and A. Longden 47

Experimental control of a single-link flexible robot arm using energy shaping
A. Sanz and V. Etxebarria 61

Output feedback receding horizon stabilization and H_∞ control for time-varying discrete-time systems
H. Katayama and A. Ichikawa 73

NUMBER 2—FEBRUARY 2007

An interactive augmented max-min MCS–RSM method for the multi-objective network reliability problem
W. C. Yeh 87

Backward elimination model construction for regression and classification using leave-one-out criteria
X. Hong and R. J. Mitchell 101

Constrained linear time-varying quadratic regulation with guaranteed optimality
B. Ding and J. H. Tang 115

Global optimization for the $\mathcal{H}_\infty$-norm model reduction problem
E. Assuñcão, H. F. Marchesi, M. C. M. Teixeira and P. L. D. Peres 125

RFDF design for linear time-delay systems with unknown inputs and parameter uncertainties
L. Bai, Z. Tian and S. Shi 139

Robust satisfactory fault-tolerant control of uncertain linear discrete-time systems: an LMI approach
D. Zhang, Z. Wang and S. Hu 151

Output feedback controller design of Takagi–Sugeno fuzzy systems
Z.-H. Xiu and W. Wang 167

Necessary and sufficient conditions for robust oscillatory stability
N. Gu, W. Yu, Y. Xiang and M. Tan 179

NUMBER 3—MARCH 2007

Robust adaptive control of synchronous generators with SMES unit via Hamiltonian function method
S. Li and Y. Wang 187

Nonlinear attitude and gyroscope's bias estimation for a VTOL UAV
J. M. Pflimlin, T. Hamel and P. Souères 197

Linear time invariant system order reduction using multipoint step response matching
S. Mukherjee, Satakshi and R. C. Mittal 211

Fuzzy two-stage quadratic programming for planning solid waste management under uncertainty
Y. P. Li and G. H. Huang 219

Analysis of variance for fuzzy data
H.-C. Wu 235

Discrete time dynamic multi-leader-follower games with feedback perfect information
P.-Y. Nie 247

Development of multiple robotic fish cooperation platform
J. Shao, L. Wang and J. Yu 257
Retailer's optimal ordering policies with trade credit financing
J.-T. Teng, C.-T. Chang, M.-S. Chern and Y.-L. Chan 269

NUMBER 4—APRIL 2007

Sensing degree of fuzziness in MCDM model using modified flexible *S*-curve MF
P. Vasant and A. Bhattacharya 279
Applying fuzzy goal programming to production/transportation planning decisions in a supply chain
T.-F. Liang 293
Spreadability and vulnerability of distributed parameter systems
A. Bernoussi 305
Behavioral interpretation of the object-oriented paradigm for interconnected dynamic system modeling
T. Bastogne 319
Stable nonlinear adaptive controller for an autonomous underwater vehicle using neural networks
J.-H. Li, P.-M. Lee, S. W. Hong and S. J. Lee 327
Integrated vendor–buyer inventory system with sublot sampling inspection policy and controllable lead time
K.-S. Wu, L.-Y. Ouyang and C.-H. Ho 339
Robust H^{∞} fuzzy control of nonlinear systems with multiple time delays
F.-H. Hsiao 351
Trajectory tracking control for a miniature fixed-wing unmanned air vehicle
W. Ren 361

NUMBER 5—MAY 2007

Solutions to generalized Sylvester matrix equation by Schur decomposition
Bin Zhou and Guang-Ren Duan 369
Numerical solutions of time-varying TS-fuzzy-model-based time-delay dynamic equations via orthogonal functions
M.-R. Hsu, W.-H. Ho and J.-H. Chou 377
Bifurcations in nonlinear integral models of biological systems
N. Hritonenko and Yuri Yatsenko 389
On the stability of epidemic spreading in small-world networks: how prompt the recovery should be?
Xiang Li and Xiaofan Wang 401
An integrated JIT–PQD model for enhancing buyer–supplier linkage (revised version)
C.-T. Chang 413
Exponential stability of delayed bidirectional associative memory neural networks with reaction diffusion terms
Anping Chen, Lihong Huang and Jinde Cao 421
A two-stage design of adaptive fuzzy controllers for time-delay systems with unknown models
J. S. Taur, G. H. Lee and C. W. Tao 433

NUMBER 6—JUNE 2007

Optimal control of SARS epidemics based on cybernetics
C. Jiang 451
H_{∞} tracking of uncertain SISO nonlinear systems: an observer-based adaptive fuzzy approach
G. G. Rigatos and S. G. Tzafestas 459
Economic ordering policy for an item with imperfect quality subject to the in-house inspection
I. Konstantaras, S. K. Goyal and S. Papachristos 473
A discrete-time single-server queue with a modified *N*-policy
Pilar Moreno 483
On allocation of resources during testing phase of a modular software
P. K. Kapur, A. K. Bardhan and V. S. S. Yadavalli 493

An alternative model for integrated vendor–buyer inventory under controllable lead time and its heuristic solution
M. A. Hoque 501

Delay-dependent criteria for robust stability of linear neutral systems with time-varying delay and nonlinear perturbations
Bin Yang, Jincheng Wang, Xuejun Pan and Chongquan Zhong 511

New formulation of robust MPC by incorporating off-line approach with on-line optimization
Baocang Ding and Biao Huang 519

NUMBER 7—JULY 2007

Fault isolation for nonlinear dynamic systems based on parameter intervals
Z. Li and B. Dahhou 531

Joint pricing and replenishment decisions for deteriorating items with lot-size and time-dependent purchasing cost under credit period
Y.-C. Tsao and G.-J. Sheen 549

A z-domain transfer function solution to the non-minimum phase acoustic beamformer
T. J. Moir 563

Robust global periodicity of interval bidirectional associative memory networks with finite distributed delays
X. Yang, D. J. Evans, Y. Y. Tang and X. Liao 577

Quasi-equilibrium in LQ differential games with bounded uncertain disturbances: robust and adaptive strategies with pre-identification via sliding mode technique
M. Jimenez-Lizarraga and A. Poznyak 585

Global exponential stability analysis of delayed Cohen–Grossberg neural networks with distributed delays
X. Lou and B. Cui 601

NUMBER 8—AUGUST 2007

Delay-dependent H_∞ controller design for linear neutral systems with discrete and distributed delays
Baoyong Zhang, Shaosheng Zhou and Shengyuan Xu 611

Direct neural network-based self-tuning control for a class of nonlinear systems
Heng Yue, Han-Xiong Li and Tianyou Chai 623

Diagnosis of fuel pump measurement bias in gas turbine engines
D. D. Santoso, S. M. Hargrave, T. V. Breikin, H. A. Thompson and P. J. Fleming 643

Automatic weight selection for $\mathcal{H}_\infty$ controller synthesis
D. C. Donha and M. R. Katebi 651

Direct adaptive fuzzy control for a class of MIMO nonlinear systems
Salim Labiod and Thierry Marie Guerra 665

Simulated annealing procedure for on-line control with process dynamics
Shihyu Chou and Min-Chiang Wang 677

NUMBER 9—SEPTEMBER 2007

Regulation of linear continuous-time singular systems with constrained states and controls
H. Boughari and N. E. Radhy 689

Existence of epidemic waves in a disease transmission model with two-habitat population
B. Mukhopadhyay and R. Bhattacharyya 699

Dynamic surface control approach to adaptive robust control of nonlinear systems in semi-strict feedback form
Zi-Jiang Yang, Toshimasa Nagai, Shunshoku Kanae and Kiyoshi Wada 709

Error bounds of optimization algorithms for semi-Markov decision processes
Tang Hao, Yin Baoqun and Xi Hongsheng 725

An iterative learning control based identification for a class of MIMO continuous-time systems in the presence of fixed input disturbances and measurement noises
Tae-Hyoung Kim and Toshiharu Sugie 737

Delay-dependent robust stability of linear systems with non-commensurate time varying delays
El Houssaine Tissir 749

Optimal age-replacement policy for repairable products under renewing free-replacement warranty
Yu-Hung Chien and Jih-An Chen 759

NUMBER 10—OCTOBER 2007

Special Issue: Advances in Sliding Mode Observation and Estimation (Part One)

Editorial 1: Higher order sliding mode observers
Yuri B. Shtessel, Sarah K. Spurgeon and Leonid M. Fridman 771

Observation of linear systems with unknown inputs via high-order sliding-modes
Leonid Fridman, Arie Levant and Jorge Davila 773

Hierarchical second-order sliding-mode observer for linear time invariant systems with unknown inputs
F. J. Bejarano, A. Poznyak and L. Fridman 793

Super twisting algorithm-based step-by-step sliding mode observers for nonlinear systems with unknown inputs
T. Floquet and J. P. Barbot 803

Describing function analysis of second-order sliding mode observers
I. Boiko, M. I. Castellanos and L. Fridman 817

Frequency characteristics of Levant's differentiator and adaptive sliding mode differentiator
Seiichi Kobayashi and Katsuhisa Furuta 825

Globally convergent real-time differentiation via second order sliding modes
Alessandro Pisano and Elio Usai 833

NUMBER 11—NOVEMBER 2007

Special Issue: Advances in Sliding Mode Observation and Estimation (Part Two)

Editorial 2: Sliding mode observation and identification
Yuri B. Shtessel, Sarah K. Spurgeon and Leonid M. Fridman 845

Sliding modes time varying matrix identification for stochastic system
A. Poznyak, J. Escobar and Y. Shtessel 847

Sliding mode identification and control for linear uncertain stochastic systems
M. Basin, A. Ferreira and L. Fridman 861

Sliding mode parameter identification of systems with measurement noise
S. Baev, I. Shkolnikov, Y. Shtessel and A. Poznyak 871

Robust fault detection and diagnosis in a class of nonlinear systems using a neural sliding mode observer
Qing Wu and Mehrdad Saif 881

Optimal braking and estimation of tyre friction in automotive vehicles using sliding modes
Nitin Patel, Christopher Edwards and Sarah K. Spurgeon 901

A sliding mode observer for sensorless induction motor speed regulation
Claudio Aurora and Antonella Ferrara 913

Smooth adaptive sliding mode observers in uncertain chaotic communication
R. Raoufi and A. S. I. Zinober 931

NUMBER 12—DECEMBER 2007

A sliding mode observer-based strategy for fault detection, isolation, and estimation in a class of Lipschitz nonlinear systems
Weitian Chen and Mehrdad Saif 943

Receding horizon H_∞ control problems for sampled-data systems
Hitoshi Katayama and Akira Ichikawa 957

An alternative Kalman innovation filter approach for receiver position estimation based on GPS measurements
Jose I. Canelon, Robert S. Provence, Nisarg Mehta and Leang S. Shieh 977

Optimization of fuzzy partitions for inductive reasoning using genetic algorithms
J. Acosta, A. Nebot, P. Villar and J.M. Fuertes 991

Simulation optimization and correlation with multi stage Monte Carlo optimization
William Conley 1013

An optimal replacement policy for repairable cold standby system with priority in use
Guan Jun Wang and Yuan Lin Zhang 1021

Neural network solution for finite-horizon H_∞ state feedback control of nonlinear systems
Tao Cheng, Frank L. Lewis and Murad Abu-Khalaf 1029
